

Technical Note No. 064

AQSync Port Assigner instructions

Date: November 21, 2024

Author: Lupita Ortega

Summary:

This procedure shows how to navigate to the port assigner and how to assign all USB hubs. This procedure can be necessary if the software has been updated for the devices to output to the touchscreen.

Please contact support@2btech.io for further questions or support regarding this procedure.

Procedure:

- 1. Navigate to the port assigner menu.
 - i) Menu > enter unique password > System > Port Assigner
 - (1) To locate the password, navigate to the menu and press "Enter" on the existing password. Then, go to the "WiFi Access Point" option in the System menu. There, you'll find the 9-digit password. Be sure to note it down, then close out of all menus to return to the main page.

	Syst	tem	Close
	WiFi Settings	WiFi Access Point	
	Static IP	Remote Control Server	
	Power Settings	Save 5 Min Avg	
	Modem Status	System Info	
<	VPN Status	Save Raw Data	
	Upload Settings	Upload Status	
	Password	Console	
	Abo	but	

- 2. At the main page, hit menu and enter the password you recorded previously.
- 3. Navigate to the port assigner by going to System > Port Assigner

4. In Port assigner, hit "Reassign". There will be a pop up window that says "For Admin use only". Hit OK.

5. Another pop up window will say to unplug all of the devices from the USB hub. Unplug all the devices and hit OK.

6. Pop ups will start to appear for each device. Plug the USB back into the USB hub making sure you are plugging in the one it requests, and then select yes. For example, NOx is what is shown below.

	Port Assigner	ſ	Close
	NOx	UNSET	
	Do you want to assign a new port to NOx	UNSET	
	CO/GP.	UNSET	
<	Particle	UNSET	>
	PowerRelay	UNSET	
	Reassign		

- 7. Repeat that step for all the devices.
- 8. When you are done, all the devices should be set. Close out of all menus to get to the main screen and make sure all of the devices are green.

NOx	NOx	•	
Ozone	NO2: -10.8 PPB		
CO/GPS/TVOC	NO: -1.2 PPB		
Particle	NOx: -12.0 PPB		
PowerRelay	12:01:53 am 15/08/2024		
Menu	Parameters	Graphing
